Viewing PDF Documents: MAC PDF Settings for Firefox

(These screenshots relate to Firefox 9.0.14 for MAC OS/X and Adobe Reader X for MAC.)

Firefox for Mac is defaulted to use Preview for pl files. Users need to change this setting to 'use Adobe Reader'.

To change the setting:

• Select Firefox – Preferences from the Firefox browser menu.

• Select Applications.

• Under Content Type, select 'pl File' and under Action select 'Use Adobe Reader.'

- Firefox must then be restarted. Close out and restart Firefox.
- When you access a PDF document, this message appears. Select '**Open**' to view the PDF document.
